

UKCRIC

UK COLLABORATORIUM
FOR RESEARCH ON
INFRASTRUCTURE & CITIES
**Inspired infrastructure
for better living**

MISSIONS

UKCRIC has developed four Missions
that underpin its forthcoming Manifesto

UKCRIC MISSIONS

UKCRIC's evolving Missions are designed to facilitate the delivery of interconnected, integrated and multi-disciplinary research **Programmes** and **Projects**.

The Missions encompass themes of resilience, sustainability, business models, governance and society.

They are shaped by the priorities of civic leaders set within the context of national and international strategies, including the UK Industrial Strategy, the Eight Great Technologies, and the UN Sustainable Development Goals.

UKCRIC is now working with Communities of Interest (people, groups and institutions) to develop the Missions, research programmes and projects and to deliver and implement their outputs.

To get involved visit www.ukcric.com

Infrastructure and urban systems for one planet living

Empowering society to thrive within the capacity of the planet through responsible consumption, resource efficiency and sustainable growth

Ownership, governance and business models for infrastructure and urban systems

Coping with greater system interdependencies, changing patterns of use and new, disruptive technologies whilst at the same time delivering social justice and affordability

Transformational infrastructure and urban systems for a changing world

Enabling infrastructure and urban systems to adapt to the challenges of climate change, changing patterns of use, societal expectations and emergent technologies

Infrastructure and urban systems as drivers of equity, inclusion and social justice

Forging healthy, happy and productive lives for all through urban design, planning, policy and infrastructure
